

# Hanlin Tang

Male | hanlintang813@gmail.com

Web Development | React.js | Full Stack

GitHub: <https://github.com/yuri2peter>

## Education

- **2011 - 2015**     **Shenyang Jianzhu University**     **Bachelor of Computer Science and Technology**
  1. Joined ACM Algorithm Competition in Liaoning Province
  2. Graduated with honors: "Human-Computer Interaction Interface Based on Computer Vision"

## Skills

1. Good at React.js frontend development: building interactive components, performance improvement, responsive design, and build processes
2. Familiar with AI tools like Claude, Cursor, and other AI assistants
3. Experience in adding AI assistants to projects
4. Skilled in Next.js and building full stack frameworks for SSR and SSG
5. Good at Node.js and Express for backend development and database work
6. Able to turn product needs into technical plans
7. Can design system structures and solve complex algorithm problems
8. Experience in deploying projects with Docker

## Work Experience

- **2022 - 2024**     **Anhui Chaoyuan Information Technology Co., Ltd.**     **Development Team Lead**
  1. Led frontend development work on traffic simulation and performance improvement
  2. Created system design solutions
  3. Set up code review and quality control processes
- **2018 - 2021**     **Anhui Xiaokou Data Technology Co., Ltd.**     **Development Team Lead**

1. Led frontend development projects focusing on complex business logic and system improvement
2. Worked with product managers to turn requirements into development tasks
3. Created system design solutions
4. Led code reviews and set up quality standards
5. Did some backend development and server maintenance work

## Open Source Projects

- **Knowlink (2025)**      <https://github.com/hlint/knowlink>

1. Built a knowledge management tool similar to Notion
2. Made a WYSIWYG Markdown editor
3. Added built-in AI assistant

- **VioletJS (2025)**      <https://github.com/hlint/violetjs>

1. A full-stack ReactJS development framework powered by Vite.
2. Supports SSR (Server-Side Rendering) and SSG (Static Site Generation).
3. Includes a built-in database and authentication.
4. Integrates oRPC (optimized Remote Procedure Call).
5. Offers additional feature integrations.

- **YLUI (2021)**      <https://ylui.yuri2.cn>

1. Built a frontend framework for making desktop-like web interfaces
2. Added multi-window management with responsive design and app store features
3. Used jQuery and Vue.js, solved compatibility and performance issues
4. Received 1.9k GitHub stars (including its other version) since 2017

## Interests

1. Movies and Music
2. Aerial Photography and FPV Drones
